MAGNETIC WATER CONDITIONERS

ABOUT US

“COEXISTENCE IS LIVING”, We are a group of Mexican companies, originated in Europe and named: Reequilibrium Group, which is created with the conviction of working to recover re-balance and stabilize what is out of balance.

Reequilibrium Group will live, operate, invest, learn, study and teach with the ideal that we have almost lost; to respect our planet, the environment and the living beings with which we share.

OUR PRODUCTS

MAGNETIC WATER CONDITIONERS

- A cylindrical stainless steel or PVC device which uses magnetic fields produced with permanent magnets to promote a physical treatment to water.
- The water is magnetically conditioned providing greater solubility to the minerals to avoid incrustations in any process through which water travels.
- It provides a serie of physical and chemical changes, that have a favorable impact on several industrial, agricultural and domestic systems.

APPLICATION AREAS

- Commercial
- Residential
- Industrial
- Agricultural

RESIDENTIAL USE

Benefits to: Heaters, air conditioners, garden irrigations, showers, sanitary, coffee machines, dish washers, etc.

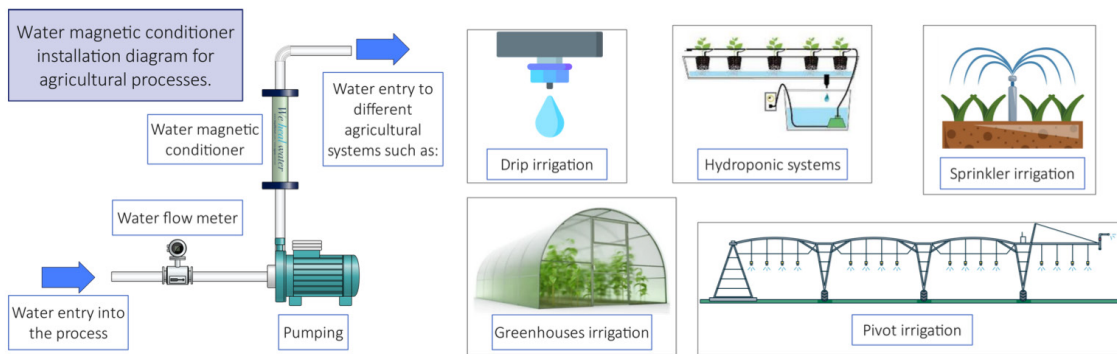

INDUSTRIAL USE

Benefits to: boilers, heaters, evaporators, condensers, cooling and distillation towers, cooling systems, heat exchangers, pasteurized distillers, sterilizers, autoclaves, reverse osmosis, etc.

AGRICULTURAL USE

Benefits to: Agricultural drip irrigation, pivots, sprinkling, greenhouses or shade houses, condensers, cooling towers, animal drinking water, aquaponics and fish farming.

WHY CHOOSE US?

We adapt to your needs

Conditioners are designed and constructed for small scale use in a house or even large-scale use, for example, for irrigation of a golf course.

No pipe incrustations

Prevents pipe scale deposits, resulting in a lower maintenance cost and less use of chemical products.

Long useful life

The conditioners have an unlimited useful life, since they are built out of stainless steel, which have a long useful life and permanent magnets with a useful life up of more than 50 years.

No electrical energy needed.

There is no need of electrical energy, its function is powered by the magnetic energy from the inside permanent magnets.

Using water magnetic conditioners, you maintain the efficiency of your equipment saving operation and maintenance costs as well as energy costs, operating sustainably respecting the environment.
